Photographic Science and Engineering

VOLUME 13, 1969; NUMBERS 1 6

TITLE INDEX

Adjusting Development Time to Influence the Characteristics of Holograms
KLAUS BIEDERMANN AND KARL A. STETSON
No. 6, p. 361

Adsorption of Developing Agents by Silver Halide Grains
L. E. OPPENHEIMER AND T. H. JAMES No. 5, p. 242

Advances in Photo-Electrolytic Imaging Systems
MICHAEL C. ZERNER, JAMES F. SOBIESKI, AND HARVEY A. HODES No. 4, p. 184

An MTF Meter for Film
M. C. GODDARD AND R. G. GENDRON No. 3, p. 150

Book Reviews

Spectra Sensitization, rev. by T. H. JAMES
No. 2, p. 90

Microphotography, rev. by CHARLES R. HANCE
No. 2, p. 90

Characterization of Kodak Metal Etch Resist Resin
WILLIAM L. HUNTER AND PHILLIP N. CRABTREE
No. 5, p. 271

Color Print Systems Based on Dispersion Photopolymerization
C. T. CHANG, F. M. LANG, G. A. THOMMES, AND P. WALKER No. 2, p. 84

Critical Design Factors Affecting the Performance of a Microdensitometer
DANIEL GALBURT, ROBERT A. JONES, AND JOHN BOSSUNG No. 4, p. 205

Determination of the Spread Function from Noisy Edge Scans
ROBERT A. JONES AND EDWARD C. YEADON
No. 4, p. 200

Developable Latent Images with Mercurous Halides
GORDON N. FLANNAGAN No. 6, p. 335

Development-Inhibitor-Releasing (DIR) Couplers in Color Photography
C. R. BARR, J. R. THIRTLE, AND P. J. VITTUM
No. 2, p. 74

Development-Inhibitor-Releasing (DIR) Couplers in Color Photography (An erratum)
C. R. BARR, J. R. THIRTLE, AND P. W. VITTUM
No. 4, p. 214

Effect of Oxygen on Photographic Sensitivity and the Mechanism of Spectral Sensitization
J. F. HAMILTON No. 6, p. 331

Effect of Polyethyleneglycols in Retarding Development by Hydroquinone
P. J. HILLSON No. 4, p. 165

Effects of Evacuation on Low-Intensity Reciprocity Failure and on Desensitization by Dyes
W. C. LEWIS AND T. H. JAMES No. 2, p. 54

Evaluations of Color Combinations in Reconnaissance Displays
S. MACLEOD, G. ALEXANDER, AND W. MEYER
No. 5, p. 246

Experiments on the Detection of Visual Signals in Noise Using Computer Generated Signals
R. P. CHAMBERS AND J. S. COURTNEY-PRATT
No. 6, p. 286

Focal Plane Determination Technique
R. A. JONES AND M. A. BERKOVITZ No. 5, p. 262

Growth Mechanism for Filamentary Silver
CHESTER R. BERRY No. 2, p. 65

Holography and Stereoscopy
NICHOLAS GEORGE AND J. T. MCCRICKERD
No. 6, p. 342

Identification of Couplers in Diazotype Products by Column Chromatography and Infrared Examination
J. E. REDDING No. 4, p. 175

Influence of Chemical Sensitization on the Characteristics of Photographic Emulsions
F. W. H. MUELLER No. 6, p. 323

Infrared to Visible Image Translation Devices
ROBERT W. ASTHEIMER No. 3, p. 127

Investigation of Image Simulation Procedures
ROBERT A. JONES No. 1, p. 24

Itek RS Process—An Introduction
GERALD L. MACLEOD No. 3, p. 93

Latent Image Regression and Intensification
EDGAR B. GUTOFF AND WILLIAM J. TIMSON
No. 3, p. 134

Light Source for Sensitometry of Aerial Films
P. D. CARMAN No. 6, p. 376

Local Inhomogeneities in the Refractive Index of Gelatin Containing a Silver Image Treated with a Tanning Bleach
EDWARD SKLAR No. 1, p. 29

Methods for Preventing Static Damage to Photographic Paper
JOHN E. OWENS No. 5, p. 280

Microscopic Spots in Processed Microfilm: Inspection of Collections to Evaluate the Effect of Iodide
R. W. HENN, BERNADETTE D. MACK, AND D. G. WIEST No. 5, p. 276

Modified Electron Transfer Mechanism for Spectral Sensitization in Photography—II
TADAAKI TANI No. 5, p. 231

On the Mechanism of Interimage Effects
H. D. MEISSNER No. 3, p. 141

Photoelectronic Effects in TiO_2 Single Crystals and Powder Layers: The Role of Chemisorbed Gas
R. R. ADDIS, JR. AND F. G. WAKIM No. 3, p. 111

Photographic Demonstration of Surface and Interior Conditions of an Unevenly Heated Liquid
ANDREW DAVIDHAZY No. 3, p. 156

Photographic Detection of Thin Cirrus Clouds
FREEMAN F. HALL, JR. No. 6, p. 371

Photosensitivity and Quantum Efficiency of Electrofax Coatings
ROBERT D. COMIZZOLI AND D. A. ROSS
No. 5, p. 265

Physical Development Recording Systems: I. General Survey and Photochemical Principles
H. JONKER, C. J. DIPPEL, H. J. HOUTMAN, C. J. G. F. JANSSEN, AND L. K. H. VAN BEEK No. 1, p. 1
Physical Development Recording Systems: II. Mercury Nucleation and the Amalgam Effect
H. JONKER, C. J. DIPPEL, H. J. HOUTMAN, A. MOLENAAR, AND E. J. SPIERTZ No. 2, p. 33
Physical Development Recording Systems: III. Physical Development
H. JONKER, A. MOLENAAR, AND C. J. DIPPEL No. 2, p. 38
Physical Development Recording Systems: IV. PD Photoplating
H. JONKER, C. J. G. F. JANSSEN, C. J. DIPPEL, TH. P. G. W. THIJSSENS, AND L. POSTMA No. 2, p. 45
Physical Properties of Holographic Materials
H. NASSENSTEIN, H. DEDDEN, H. J. METZ, H. E. RIECK, AND D. SCHULTZE No. 4, p. 194
Polarographic Studies of the Electrochemical and Aerial Oxidation of Some Developing Agents
M. BREZINA, W. JAENICKE, AND H. RAITHEL No. 6, p. 320
Quality Criteria of Photographic Materials for Use in Holography
M. DE BELDER No. 6, p. 351
Quantum Efficiencies in Several Itek Processes
E. J. DELORENZO, L. K. CASE, E. M. STICKLES, AND W. A. STAMOULIS No. 3, p. 95
Quantum Sensitivity of Photographic Emulsion Grains as the Number of Quanta Absorbed per Grain
H. THIRY No. 3, p. 144
Recent Observations on Spectral Sensitization and Supersensitization
W. WEST AND P. B. GILMAN No. 5, p. 221
Reduction Reactions with Irradiated Photoconductors
E. BERMAN No. 2, p. 50
Redox Stability of the Photographic Grain Surface Latent-Image
W. F. BERG AND E. A. EREI No. 2, p. 81
Re-examination of Resolution Prediction from Lens MTF's and Emulsion Thresholds
RICHARD WILLIAMS No. 5, p. 252
Simplified Method for Determining Residual Thiosulfate in Processed Microfilm
C. I. POPE No. 5, p. 278
Some Aspects of the Behavior of the Tin Oxide Semiconductor Electrode
H. LERNER No. 3, p. 103
Some Aspects of the Photothermographic Behavior of Potassium Trisoxalacobaltate(III) Trihydrate
H. E. SPENCER No. 3, p. 147
Sensitometric Simulation of the Spectral Emission of Standard Phosphors
DAVID A. CREE No. 1, p. 18
Superadditive Developers
G. I. P. LEVENSON No. 6, p. 299
Superadditivity of Hydroquinone Phenidone Developers. VII. The Influence of the Concentrations of Hydroquinone, Phenidone, and Sodium Sulfite
G. F. VAN VEELEN No. 1, p. 9
Superadditivity with Hydroquinone of Photographic Developing Agents Forming Stable Semiquinones. VIII. Heterocyclic Azines
J. F. WILLEMS, G. F. VAN VEELEN, AND A. VANDENBERGUE No. 6, p. 312
Supersensitizers
OSKAR RIESTER No. 1, p. 13
Surface Photovoltage Effects in Titanium Dioxide Films
PAUL VOHL No. 3, p. 120
Surface Structure and Reaction Rates of AgBr Microcrystals
CHESTER R. BERRY AND DAVID C. SKILLMAN No. 2, p. 69
T/Number of Endoscopes
J. H. HETT AND R. H. QUINT No. 4, p. 210
Technique for Measuring Kinetics of Development in Liquid Emulsions
F. E. FORD No. 4, p. 171
Thin-layer Chromatography on Silver Halide: Determination of Relative Adsorptivities of N,N-Dialkyl-*p*-phenylenediamines and *p*-Aminophenols on Silver Bromide
B. W. ROSSITER AND K. L. EDDY No. 4, p. 178

AUTHOR INDEX

ADDIS, JR., R. R.
Photoelectronic Effects in TiO_2 Single Crystals and Powder Layers: The Role of Chemisorbed Gas No. 3, p. 111

ALEXANDER, G., see Macleod, S.

ASTHEIMER, ROBERT W.
Infrared to Visible Image Translation Devises No. 3, p. 127

BARR, C. R.
Development-Inhibitor-Releasing (DIR) Couplers in Color Photography No. 2, p. 74

BERG, W. F.
The Redox Stability of the Photographic Grain-Surface Latent-Image No. 2, p. 81

BERKOVITZ, M. A., see Jones, R. A.

BERMAN, E.
Reduction Reactions with Irradiated Photoconductors No. 2, p. 50

BERRY, CHESTER R.
A Growth Mechanism for Filamentary Silver No. 2, p. 65
Surface Structure and Reaction Rates of AgBr Microcrystals No. 2, p. 69

BIEDERMANN, KLAUS
Adjusting Development Time to Influence the Characteristics of Holograms No. 6, p. 361

BOSSUNG, JOHN W., see Galburt, Daniel

BREZINA, M.
Polarographic Studies of the Electrochemical and Aerial Oxidation of Some Developing Agents No. 6, p. 320

CARMAN, P. D.
A Light Source for Sensitometry of Aerial Films No. 6, p. 376

CASE, L. K., see DeLorenzo, E. J.

CHAMBERS, R. P.
Experiments on the Detection of Visual Signals in Noise Using Computer Generated Signals No. 6, p. 286

CHANG, C. T.
Color Print Systems Based on Dispersion Photopolymerization No. 2, p. 84

COMIZZOLI, ROBERT B.
Photosensitivity and Quantum Efficiency of Electrofax Coatings No. 5, p. 265

COURTNEY-PRATT, J. S., see Chambers, R. C.

CRABTREE, PHILLIP N., see Hunter, William L.

CREE, DAVID A.
Sensitometric Simulation of the Spectral Emission of Standard Phosphors No. 1, p. 18

DAVIDHAZY, ANDREW
Photographic Demonstration of Surface and Interior Conditions of an Unevenly Heated Liquid No. 3, p. 156

DE BELDER, M.
Quality Criteria of Photographic Materials for Use in Holography No. 6, p. 351

DEDDEN, H.
Physical Properties of Holographic Materials No. 4, p. 194

DELORENZO, E. J.
Quantum Efficiencies in Several Itek Processes No. 3, p. 95

DIPPEL, C. J., see Jonker, H.
——, see Jonker, H.
——, see Jonker, H.

EDDY, K. L., see Rossiter, B. W.

FLANNAGAN, GORDON N.
Developable Latent Images with Mercurous Halides No. 6, p. 335

FORD, F. E.
Technique for Measuring Kinetics of Development in Liquid Emulsions No. 4, p. 171

FREI, E. A., see Berg, W. F.

GALBURT, DANIEL
Critical Design Factors Affecting the Performance of a Microdensitometer No. 4, p. 205

GENDRON, R. G., see Goddard, M. C.

GILMAN, P. B., see West, W.

GEORGE, NICHOLAS
Holography and Stereoscopy No. 6, p. 342

GODDARD, M. C.
An MTF Meter for Film No. 3, p. 150

GUTOFF, EDGAR B.
Latent Image Regression and Intensification No. 3, p. 134

HALL, FREEMAN-F., JR.
Photographic Detection of Thin Cirrus Clouds No. 6, p. 371

HAMILTOM, F.
Effect of Oxygen on Photographic Sensitivity and the Mechanism of Spectral Sensitization No. 6, p. 331

HENN, R. W.
Microscopic Spots in Processed Microfilm: Inspection of Collections to Evaluate the Effect of Iodide No. 5, p. 276

HETT, J. H.
T/number of Endoscopes No. 4, p. 210

HILLSON, P. J.
The Effect of Polyethyleneglycols in Retarding Development by Hydroquinone No. 4, p. 165

HODES, HARVEY A., see Zerner, Michael C.

HOUTMAN, H. J., see Jonker, H.
——, see Jonker, H.

HUNTER, WILLIAM H.
Characterization of Kodak Metal Edge Resist Resin No. 5, p. 271

JAENICKE, W., see Brezina, M.

JAMES, T. H., see Lewis, W. C.
——, see Oppenheimer, L. E.

JANSSEN, C. J. G. F., see Jonker, H.

JONES, ROBERT A.
Determination of the Spread Function from Noisy Edge Scans No. 4, p. 200
Focal Plane Determination Technique No. 5, p. 262
